

Riesling Berg 2024

The 2024 Riesling Berg comes from Triassic limestone and was made in stainless steel only. Gorgeous, pure lemon comes with supple creaminess and just a hint of apricot on the nose. The palate is super slender, bright, pure, vivid and straight. This is a gorgeously taut, slender Riesling that is like a tonic, compact but completely wonderful. This went through full malolactic conversion but you would never know. (Bone-dry)

Riesling Berg 2023

The 2023 Riesling Berg, picked in early October, is sourced from four different plots of clay and Triassic limestone, all vinified in separate tanks. A lovely mandarin peel aroma plays around the subtle lemon on the nose, making for a scented, fresh, sunny Riesling. The palate is taut, friendly, vivid and light-footed, yet there is nothing facile about it. Yum. (Bone-dry)

A very aromatic, fresh, dry Riesling for Alsace with stacks of white tree fruit aromas plus notes of lemon blossoms and summer flowers. A very elegant mid-weight wine with excellent concentration, terrific fruit and beautifully integrated acidity. So much aging potential, and a bargain. From organically grown grapes with Fair'n Green certification. Drink or hold.
